Forecast for Saturday 09 Nov 2024

Weather: Mostly dry but the odd spot of drizzle at times. Extensive cloud will cover the area with widespread hill fog on the tops this morning. However, a few isolated bright or clear intervals are possible, mainly across the north of the area this afternoon and evening.

Chance of cloud-free hill tops above 600m: 20% becoming 90% this afternoon and evening.

Low cloud and visibility: Areas of low cloud above 400 or 500m with patches on lower slopes. Cloud will lift to 600 or 700m this afternoon, therefore many hill tops will become clear. Limited cloud breaks may also develop this afternoon and evening, mainly across northern location. Rather hazy at low levels below the cloud base.

Forecast for Sunday 10 Nov 2024

Weather: Chance of limited cloud breaks and so clear intervals overnight, but generally it will be cloudy with the bases lowering and hill fog forming. Staying predominantly cloudy during the day, with cloud bases lifting through the morning. Some bright or sunny intervals may develop, most likely in the afternoon. Through the evening becoming cloudy, with hill for reforming as patchy light rain or drizzle arrives late evening.

Maximum wind: West or northwest 10 mph in the evening.

Chance of cloud-free hill tops 600m: 20% overnight, early morning and in the evening. Improving 80% through the day.

Low cloud and visibility: Extensive cloud bases around 500 to 600m developing overnight and through the evening, giving difficult navigation conditions. Cloud bases lifting through the day above most hill tops, with some limited cloud breaks developing. Occasionally poor visibility in rain or drizzle, with hazy conditions persisting beneath the cloud.

Temperature: **Valleys:** Plus 6C rising to 12 or 13C.
At 600m: Plus 5C rising to 9C.
Freezing level: Above summits.
